

Maintains an even pattern on undulating courses

Standard nozzles designed to operate at 50cm

Output is greater under centre of nozzle – overlap between adjacent nozzles evens out the deposition

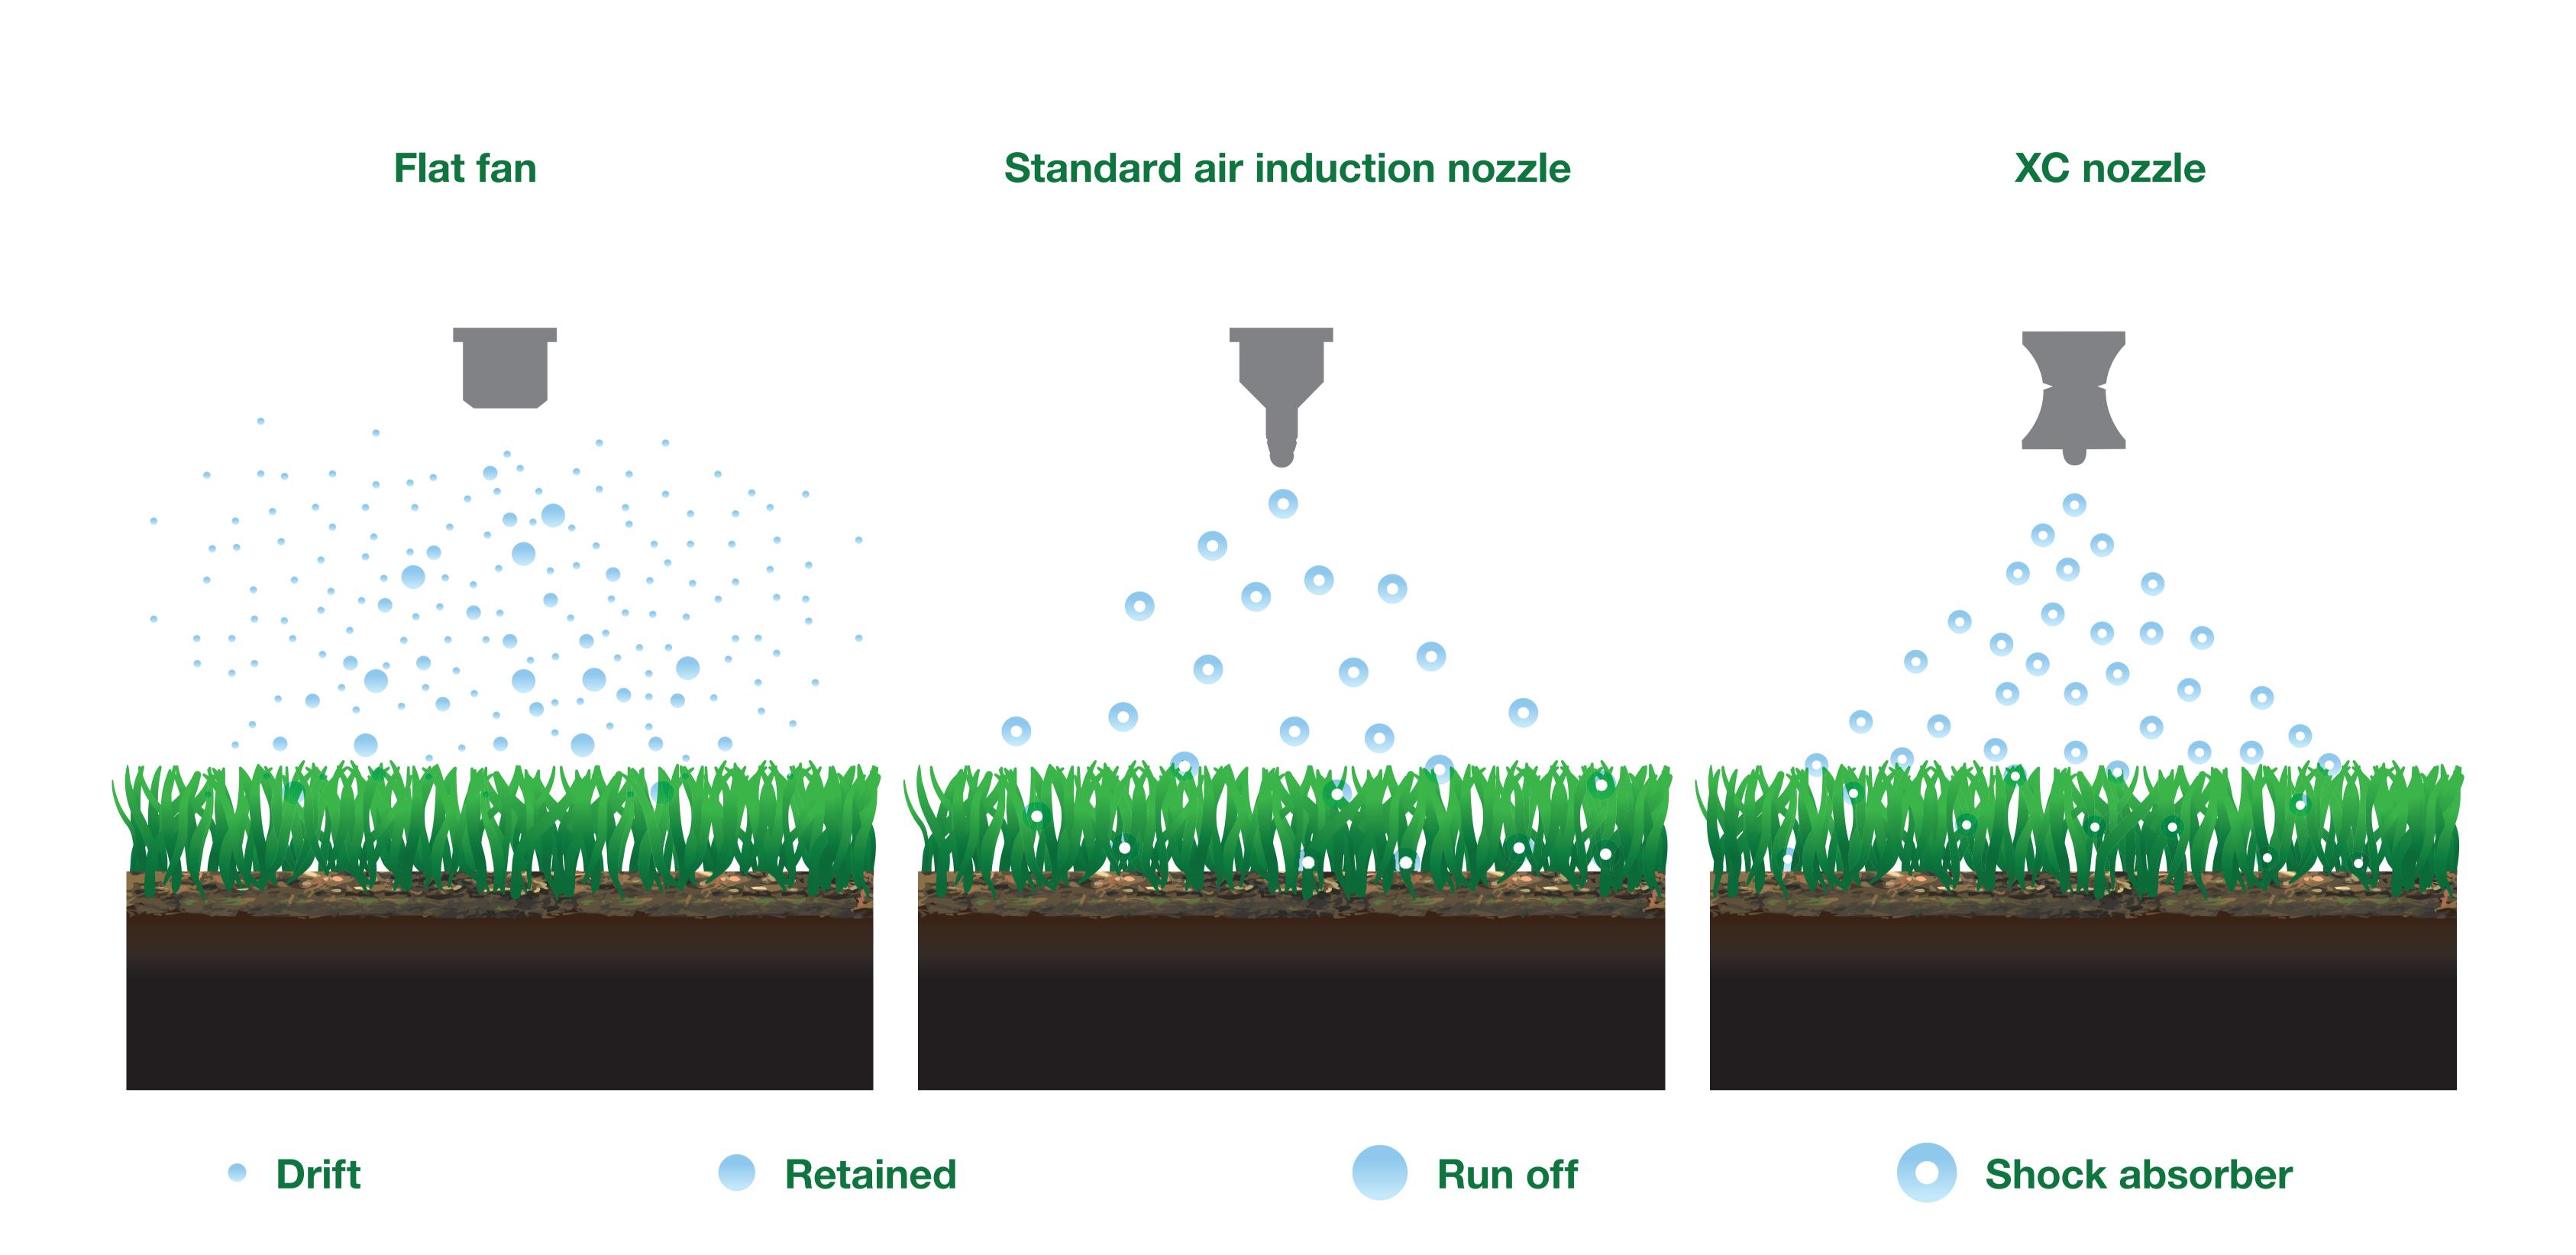

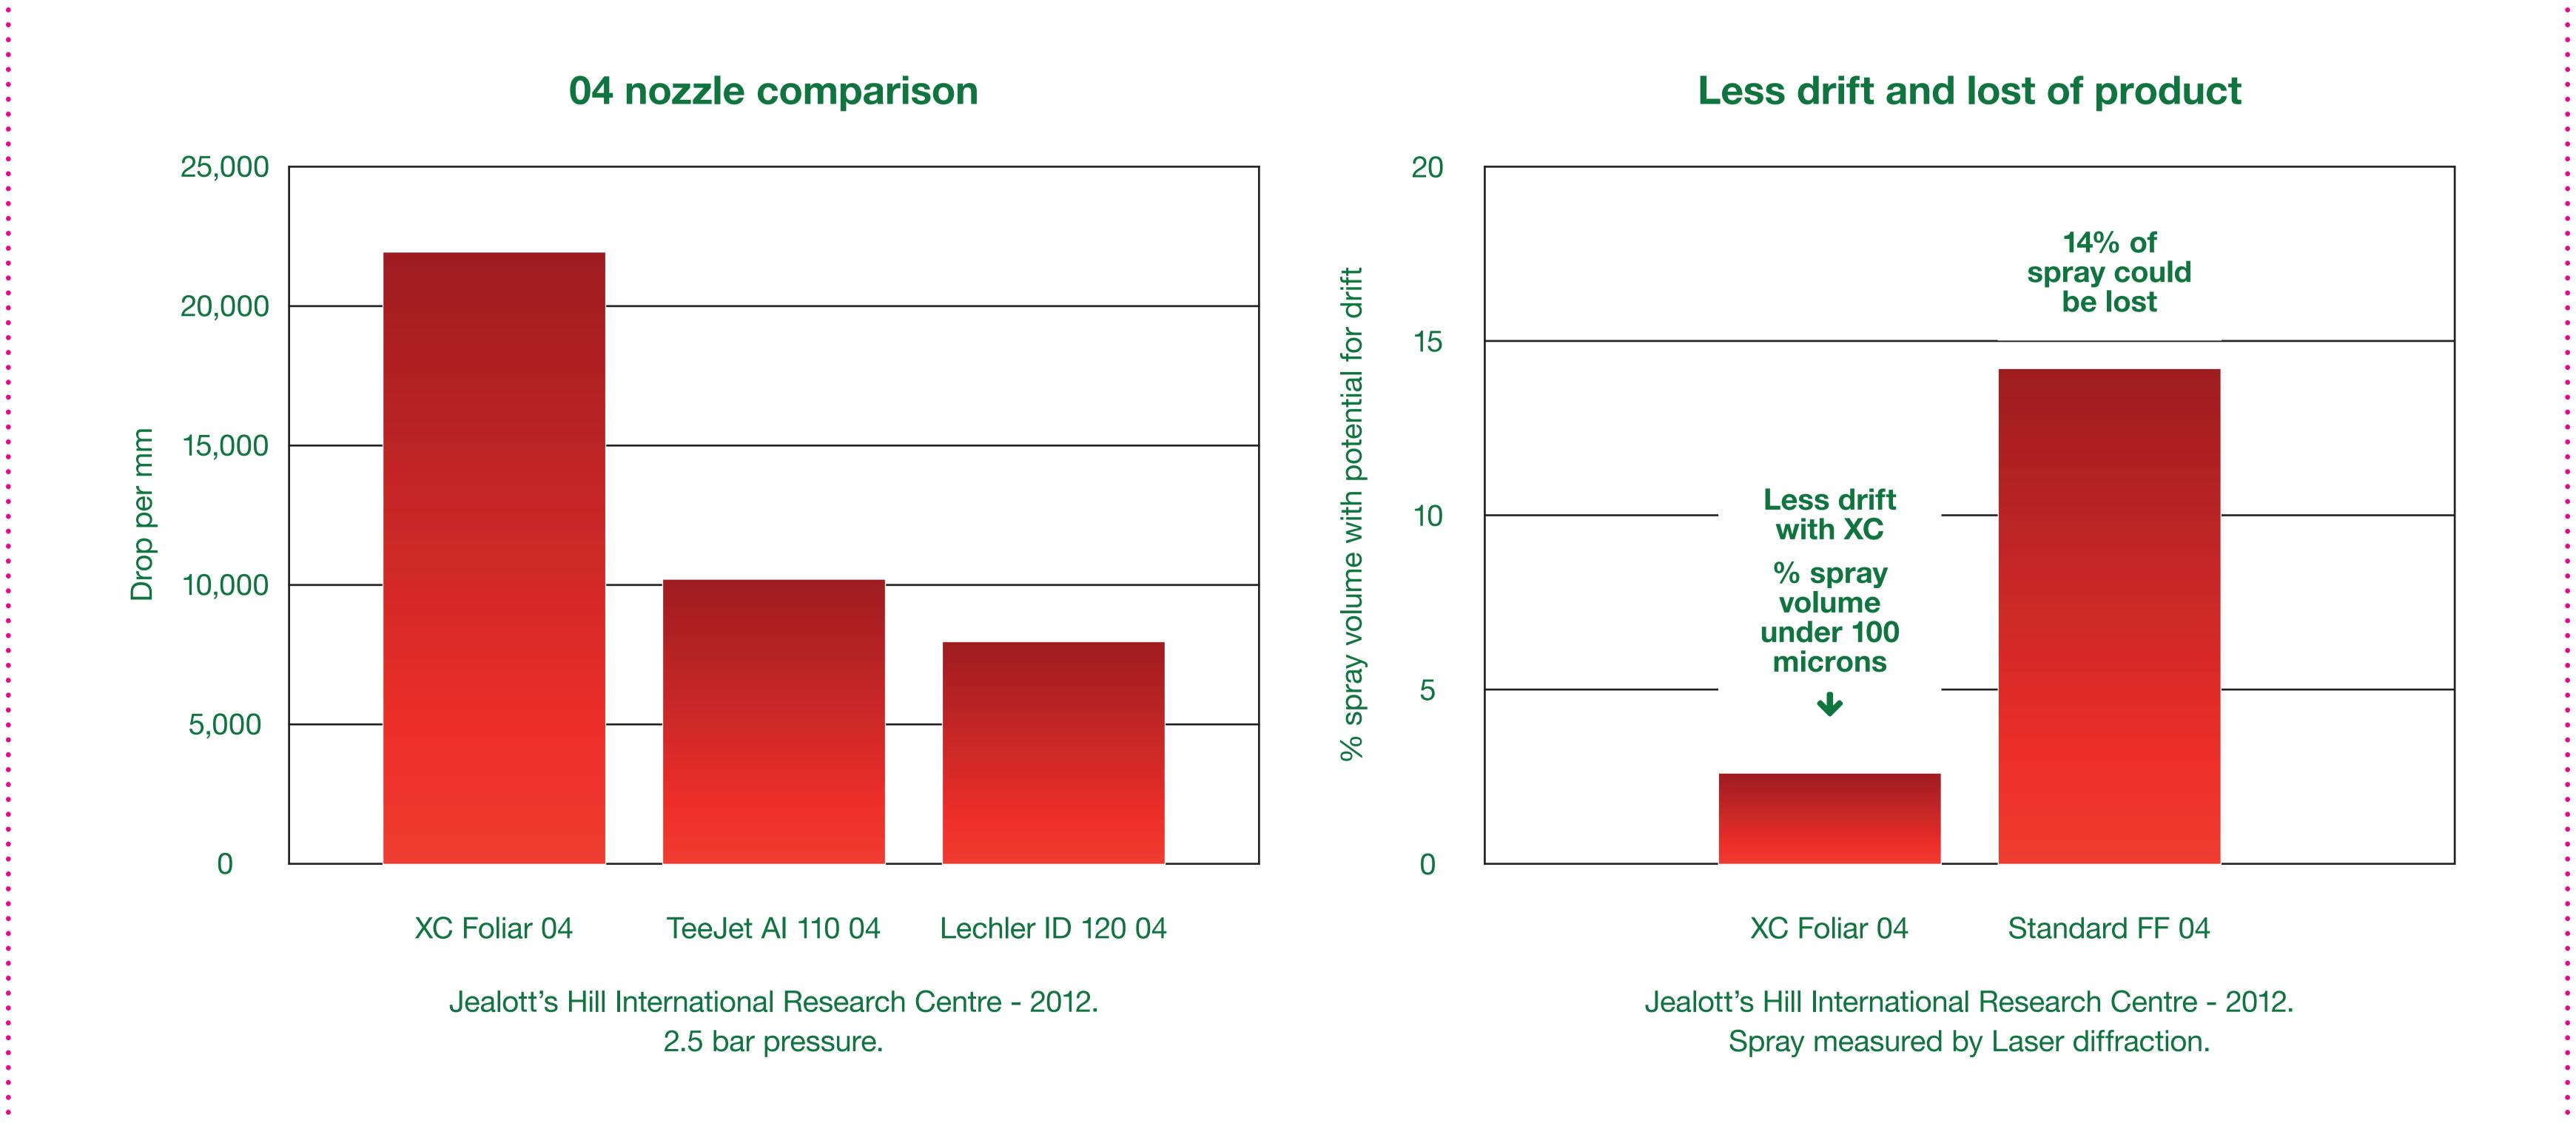

Combats spray drift

Benefits of XC air induction

Spraying slopes or undulating ground can significantly affect nozzle height and spray pattern coverage with standard nozzles

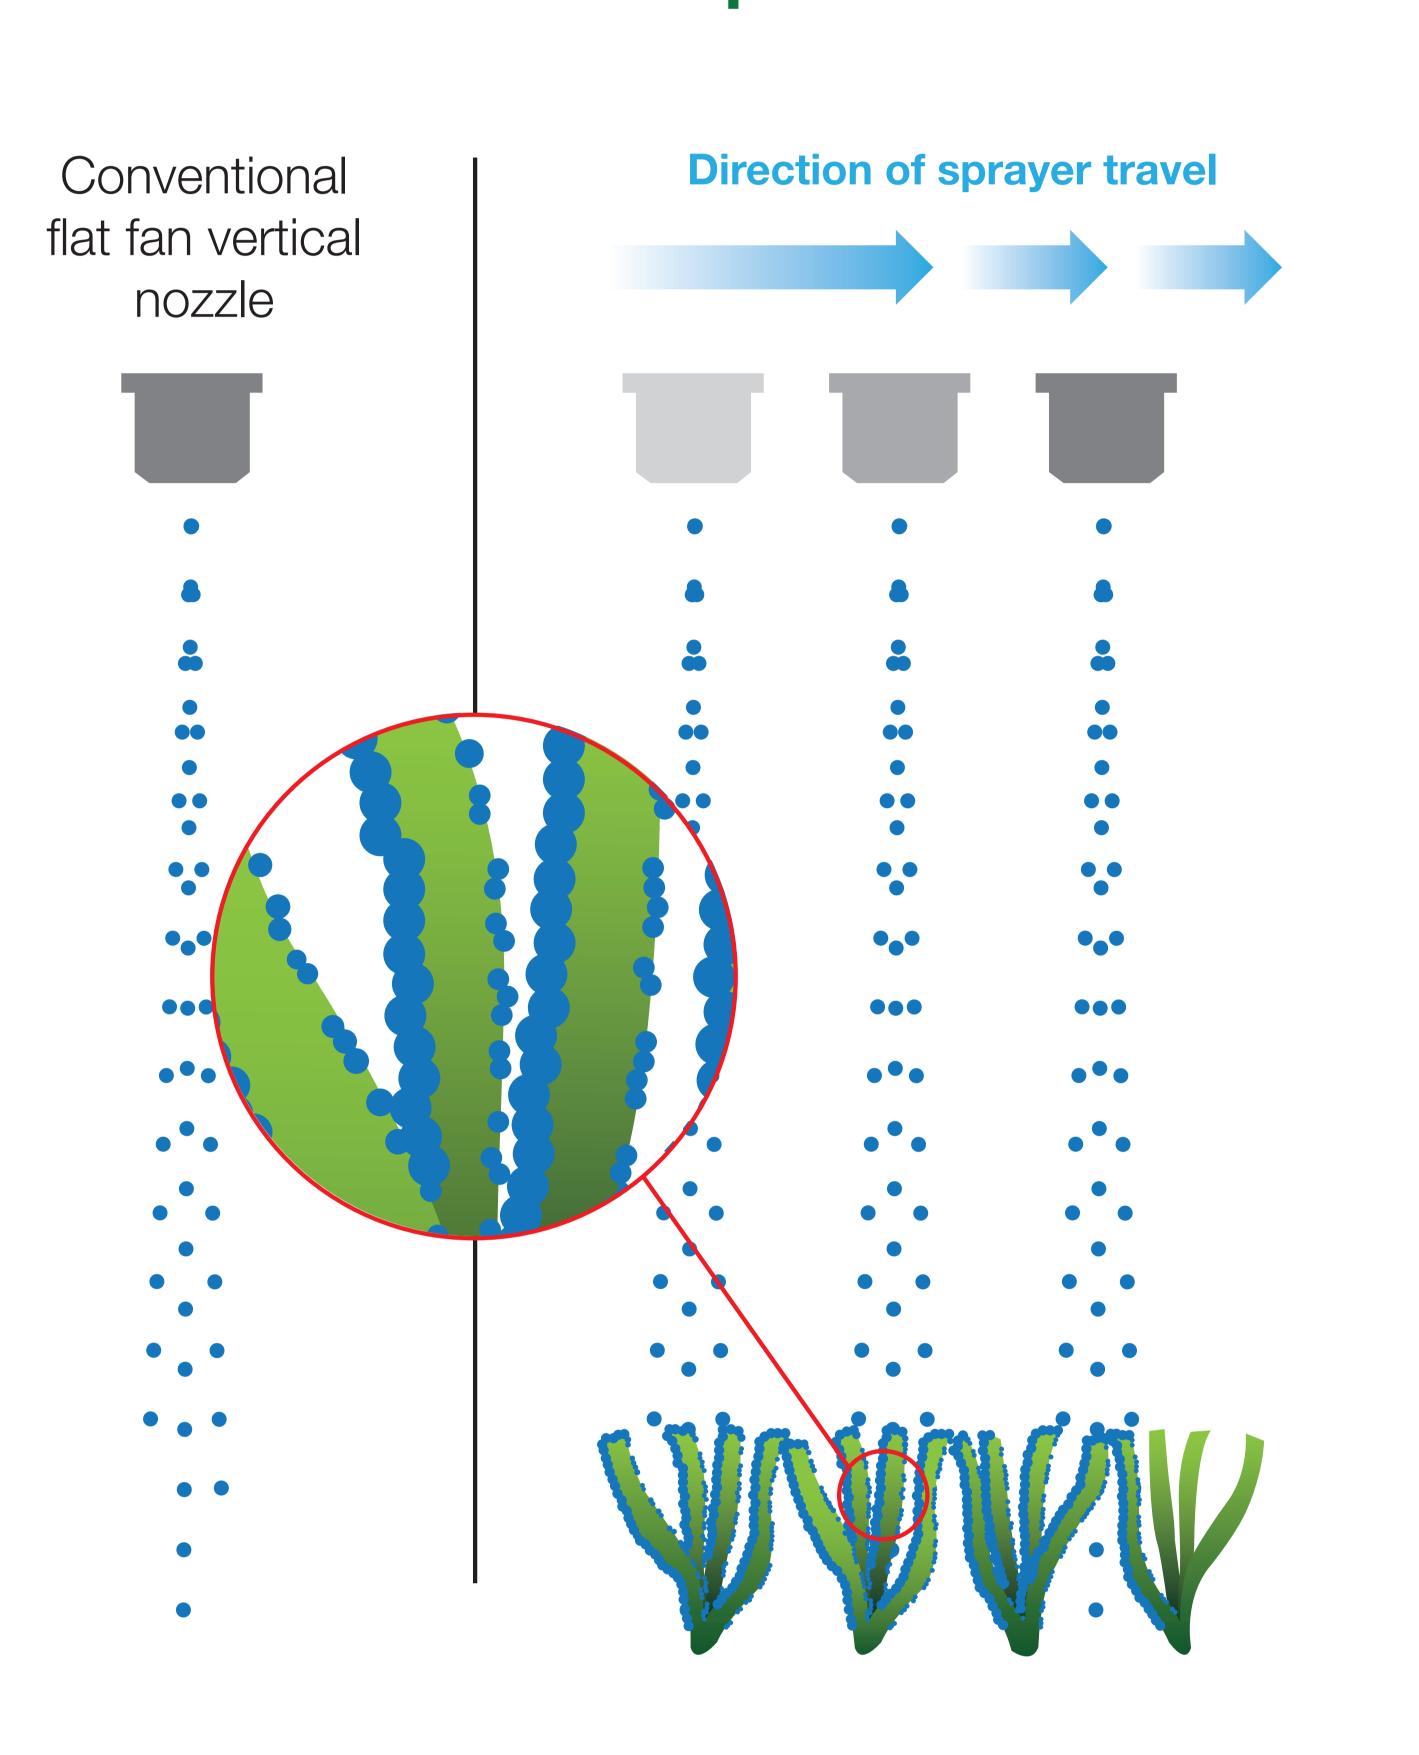

More droplets for superior coverage

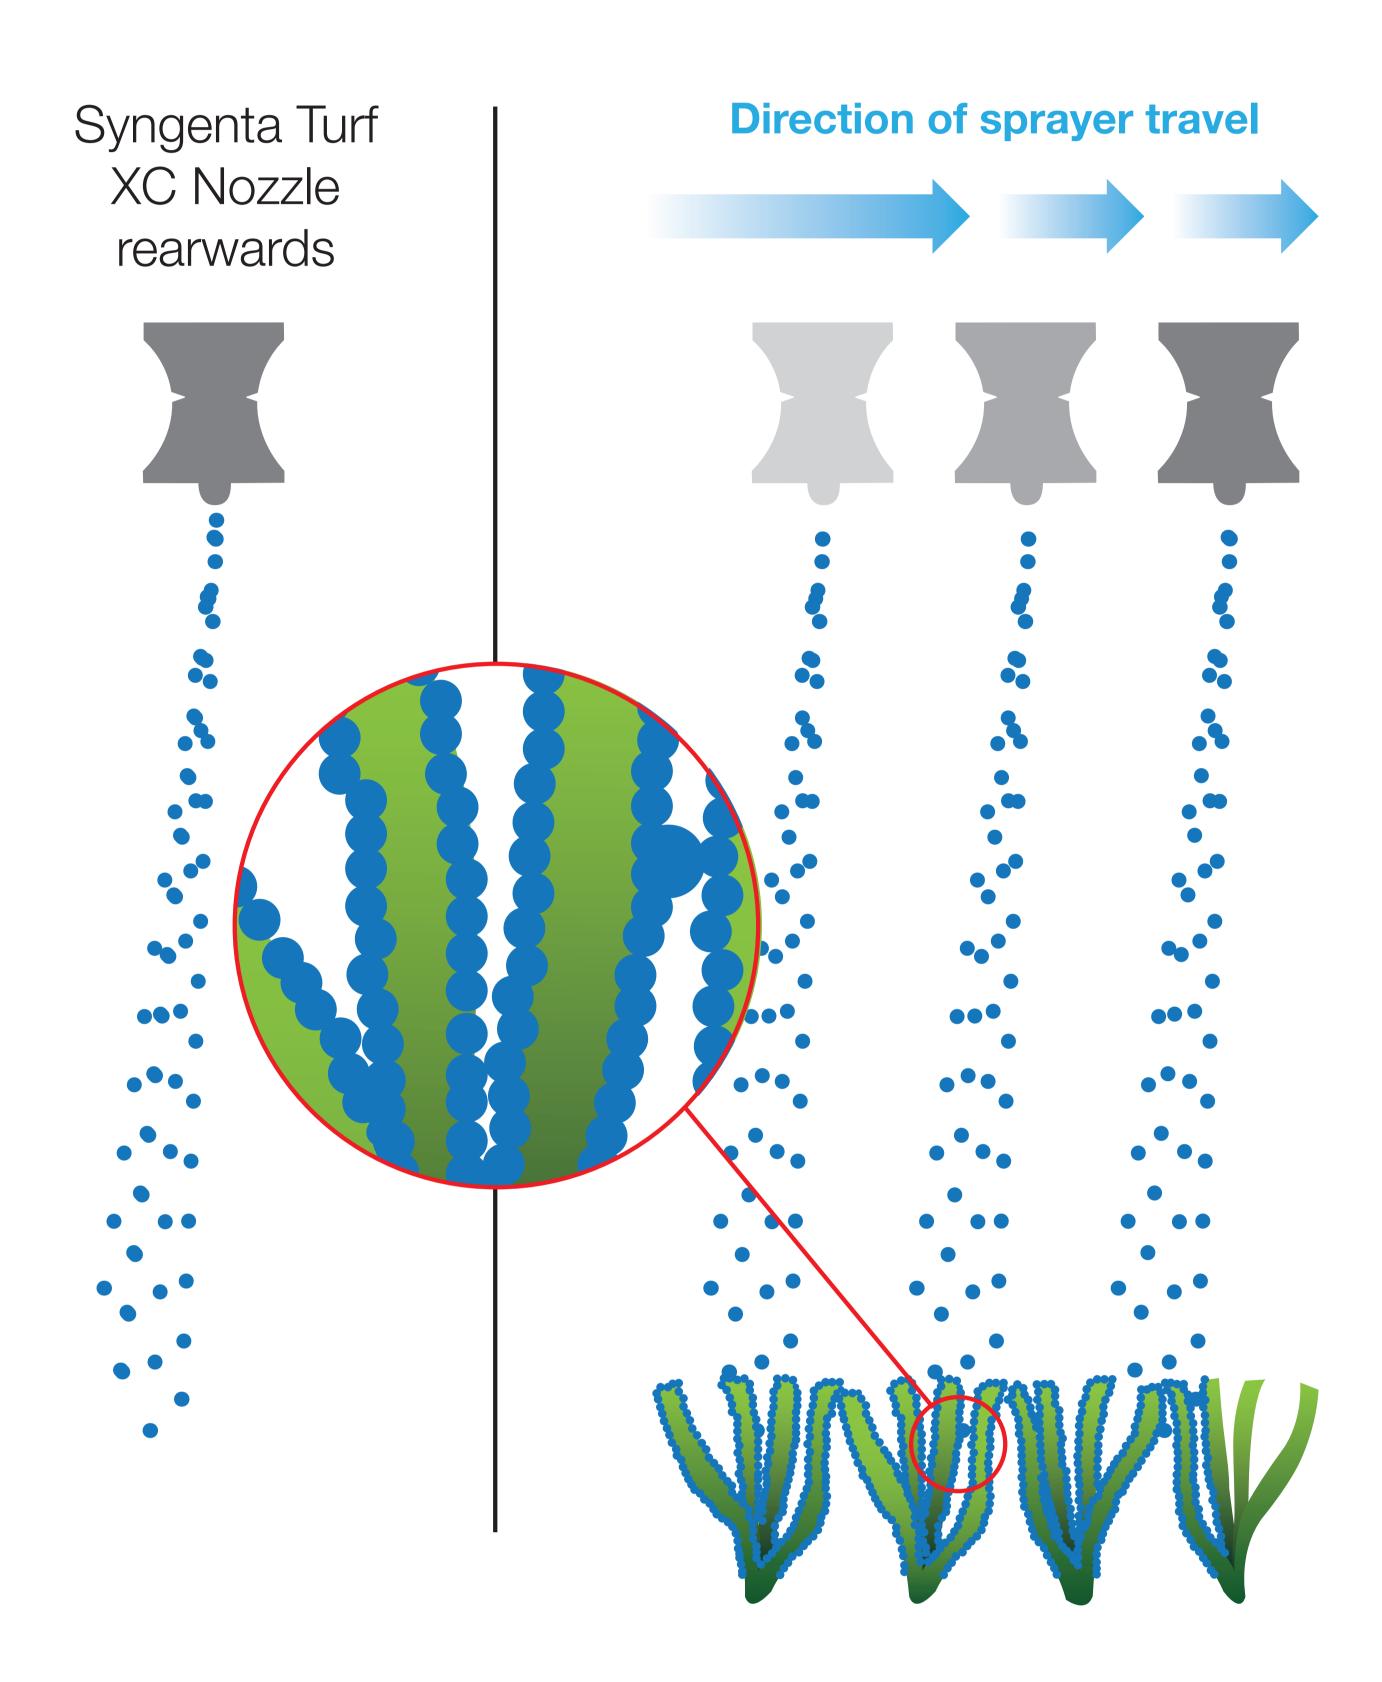

Backwards spray angle enhances coverage even at low water volumes

Backward angle provides superior coverage

With the forward movement of the sprayer, droplets that are discharged vertically mainly hit one side of the target leaf

The rearwards facing nozzle angle compensates for the forward movement of the sprayer and give all round coverage of the target leaf

Which XC nozzle?

Nozzle	Products	Target
Foliar XC 025 or 04	Primo Maxx	Leaf
	Headway	
	Banner Maxx	
	Instrata	
	Heritage Maxx	
	Heritage WG	
	Medallion TL	
Soil XC 08	Qualibra	Root zone
	Heritage Maxx	
	Heritage WG	
	Headway
